how to use the text encrypter/dicripter

Description

Introducing the Text Encrypter/Decrypter by tech assistant for blind!

Listen Tutorial on YouTube.
This platform offers you the capability to enhance the security of your text through encryption, which you can securely share with anyone. Moreover, you can effortlessly provide the encrypted text to others, allowing them to decrypt it and reveal the encrypted seamlessly using this powerful tool.

Using our Text Encrypter/Decrypter feature is easy! Just follow the simple steps.

To encrypt any text, follow these steps:

1. Open the tool and click on the "Encrypt a text" button.
2. Enter the text you wish to encrypt in the designated field.
3. Click on the "Encrypt" button located just below.
4. Done! You will now have your encrypted text, which appears as a jumble of characters.

To decrypt the text and retrieve the original message, follow these steps:

1. Open our tool and click on the "Decrypt an encrypted text" button.
2. Paste the encrypted text into the provided field.
3. Hit the "Decrypt" button.
4. Congratulations! The exact text that was written while encrypting will be revealed just below that.

It's important to note that we prioritize your privacy and data security. Our tool does not store any text you encrypt or decrypt on our servers, ensuring that your information remains confidential. We understand the significance of maintaining a high level of security, and that's why our Text Encrypt feature is designed to be totally secure and free to use.

We also strive to ensure accessibility for everyone, including users who rely on screen readers. Our feature is fully accessible, allowing visually impaired individuals to navigate and utilize the tool effortlessly.

Try this powerful tool now! https://www.techassistantforblind.com/text-encryptor-decryptor

Hope you will find it useful.

Thanks.
